

uvex hypervision system. style. safety.

functional goggles in an appealing, modern design with a large field of vision for a wide range of applications

UV400 — 100% protection against dangerous UV radiation up to 400 nm

indirect ventilation system increases air circulation

a sustainable benefit: lenses can be replaced when required

optimised lens design for edge-to-edge optical clarity and increased safety

optional faceguard provides additional facial protection — multi-stage locking and parking positions allow flexible handling during use (except 9321902)

soft, adaptive face seal provides a universal fit for different head and facial shapes as well as a tight fit without pressure points

robust polycarbonate lens with uvex's proven supravision coating technology — permanent anti-fog and scratch-resistant lens

generous internal volume and recesses for the side arms of the glasses allow comfortable wear without pressure points, even for spectacle wearers

length-adjustable textile headband with multi-incline points allows for a high level of individualisation to ensure a good fit for all facial shapes and head widths
